

Product & Service Range

About Pace

For over 46 years, PACE has been a trusted provider of high-quality and reliable compressed air solutions, from machinery to service and sourcing, for industry leaders in various sectors including automobiles, glass, textile, cement, packaging, chemicals, steel, metals, pharmaceuticals, and food & beverage.

Our Solutions

We offer a diverse selection of industrial solutions, including refrigerated compressed air dryers, filters, and elements; crane cabin AC; dehumidifiers; drain valves; moisture separators; and spares and accessories

Our services encompass testing and certification (i.e., dew point measurement, air flow, wall thickness, health testing), hot tapping, servicing and commissioning of dryers and filters, and sourcing

Mission

Optimizing the performance and efficiency of our clients with comprehensive industrial solutions, from machinery to service and sourcing

Vision

Our vision is to be the premier one-stop solution provider of cutting-edge, cost-effective, and tailored industrial solutions, enabling our clients to stay ahead in their respective industries and achieve their business objectives.

We'll help you find the right solutions for your business

Our products

Refrigerated Compressed Air Dryer

A device that removes moisture from compressed air by cooling the air to a point where water vapor condenses and is removed, resulting in dry, compressed air suitable for industrial applications.

Compressed Air Filter

It is responsible for purifying the compressed air or gas by removing impurities such as dust, oil, and water.

Moisture Separator

An equipment used to remove water droplets from compressed air or gas streams in order to prevent corrosion and damage to the system.

Drain Valve

A mechanical device used in industrial systems to facilitate the release of condensed moisture from a pressurized container or pipeline.

Dehumidifier

It is an electrical appliance that removes excess moisture from the air, and improves the air quality and comfort.

Crane Cabin AC

It is a specialized cooling system that is designed to provide a comfortable and safe working environment for operators in cranes and other heavy equipment

Digital Thickness Meter

It is a precision instrument used to measure the thickness of various materials with high accuracy.

Hot Tapping

A process that can create a connection point on a pressurized pipeline without shutting down the flow of the compressed air

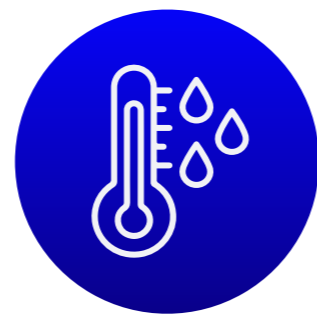

Our Services

Servicing

Servicing of compressed air dryers and filters refers to the maintenance and upkeep of these devices.

Dew Point measurement testing

It provides a solution by accurately determining the moisture content and potential for condensation within a compressed gas or air stream.

Compressed air flow testing

It is a measure of the flow rate of a compressed air through a particular pipeline.

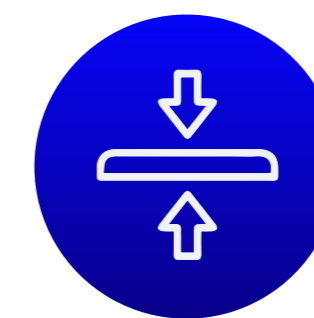

Health testing

It is essential with respect to air dryers and filters because it helps to identify and address any potential issues or problems with the air quality as well as any component level issues.

Sourcing

Sourcing is procurement of equipment, systems, and spare parts that may not be within our standard product range

Wall thickness testing

It determines the thickness of the walls of pipes and vessels, and to ensure that they are thick enough to withstand the forces they are subjected to.

Industries we work with

Since our establishment in 1977, we have consistently provided reliable and high-quality products to some of India's top corporations across various sectors. Our timely delivery and commitment to meeting agreed specifications has earned us a solid reputation in the industry.

Cement

Chemicals

Pharmaceuticals

Textile

Automobiles

Steel

Glass

Metals

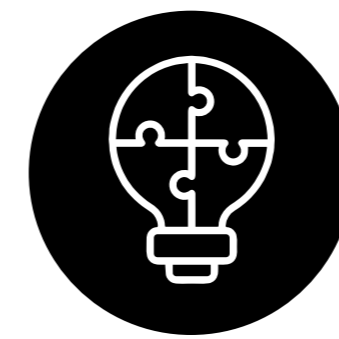

Packaging

Food & Beverage

Why choose us

One Stop Solution

Assisting clients in obtaining high-quality equipment that consistently meets performance specifications, including non-standard products and components

Personalized Technical Support

Trust in PACE for prompt and personalized service, tailored to your specific needs, including repair, servicing, and commissioning.

Cost Effective

Our products have competitive pricing, despite being higher than other makes. The added technical benefits justify the cost.

Reliability And Longevity Of Our Products

We deliver reliable, long-lasting products with high-quality German and British products with minimal downtime.

Other Solutions

Compressed Air Dryers | Filters | Drain Valves | Dehumidifiers | Crane Cabin A/C | Moisture Separators | Accessories & Spares | Sourcing | Testing & Certification | Servicing & Commissioning
