

Refrigerated Compressed Air Dryer

“Dry, high-quality compressed air for industrial use.”

About Pace

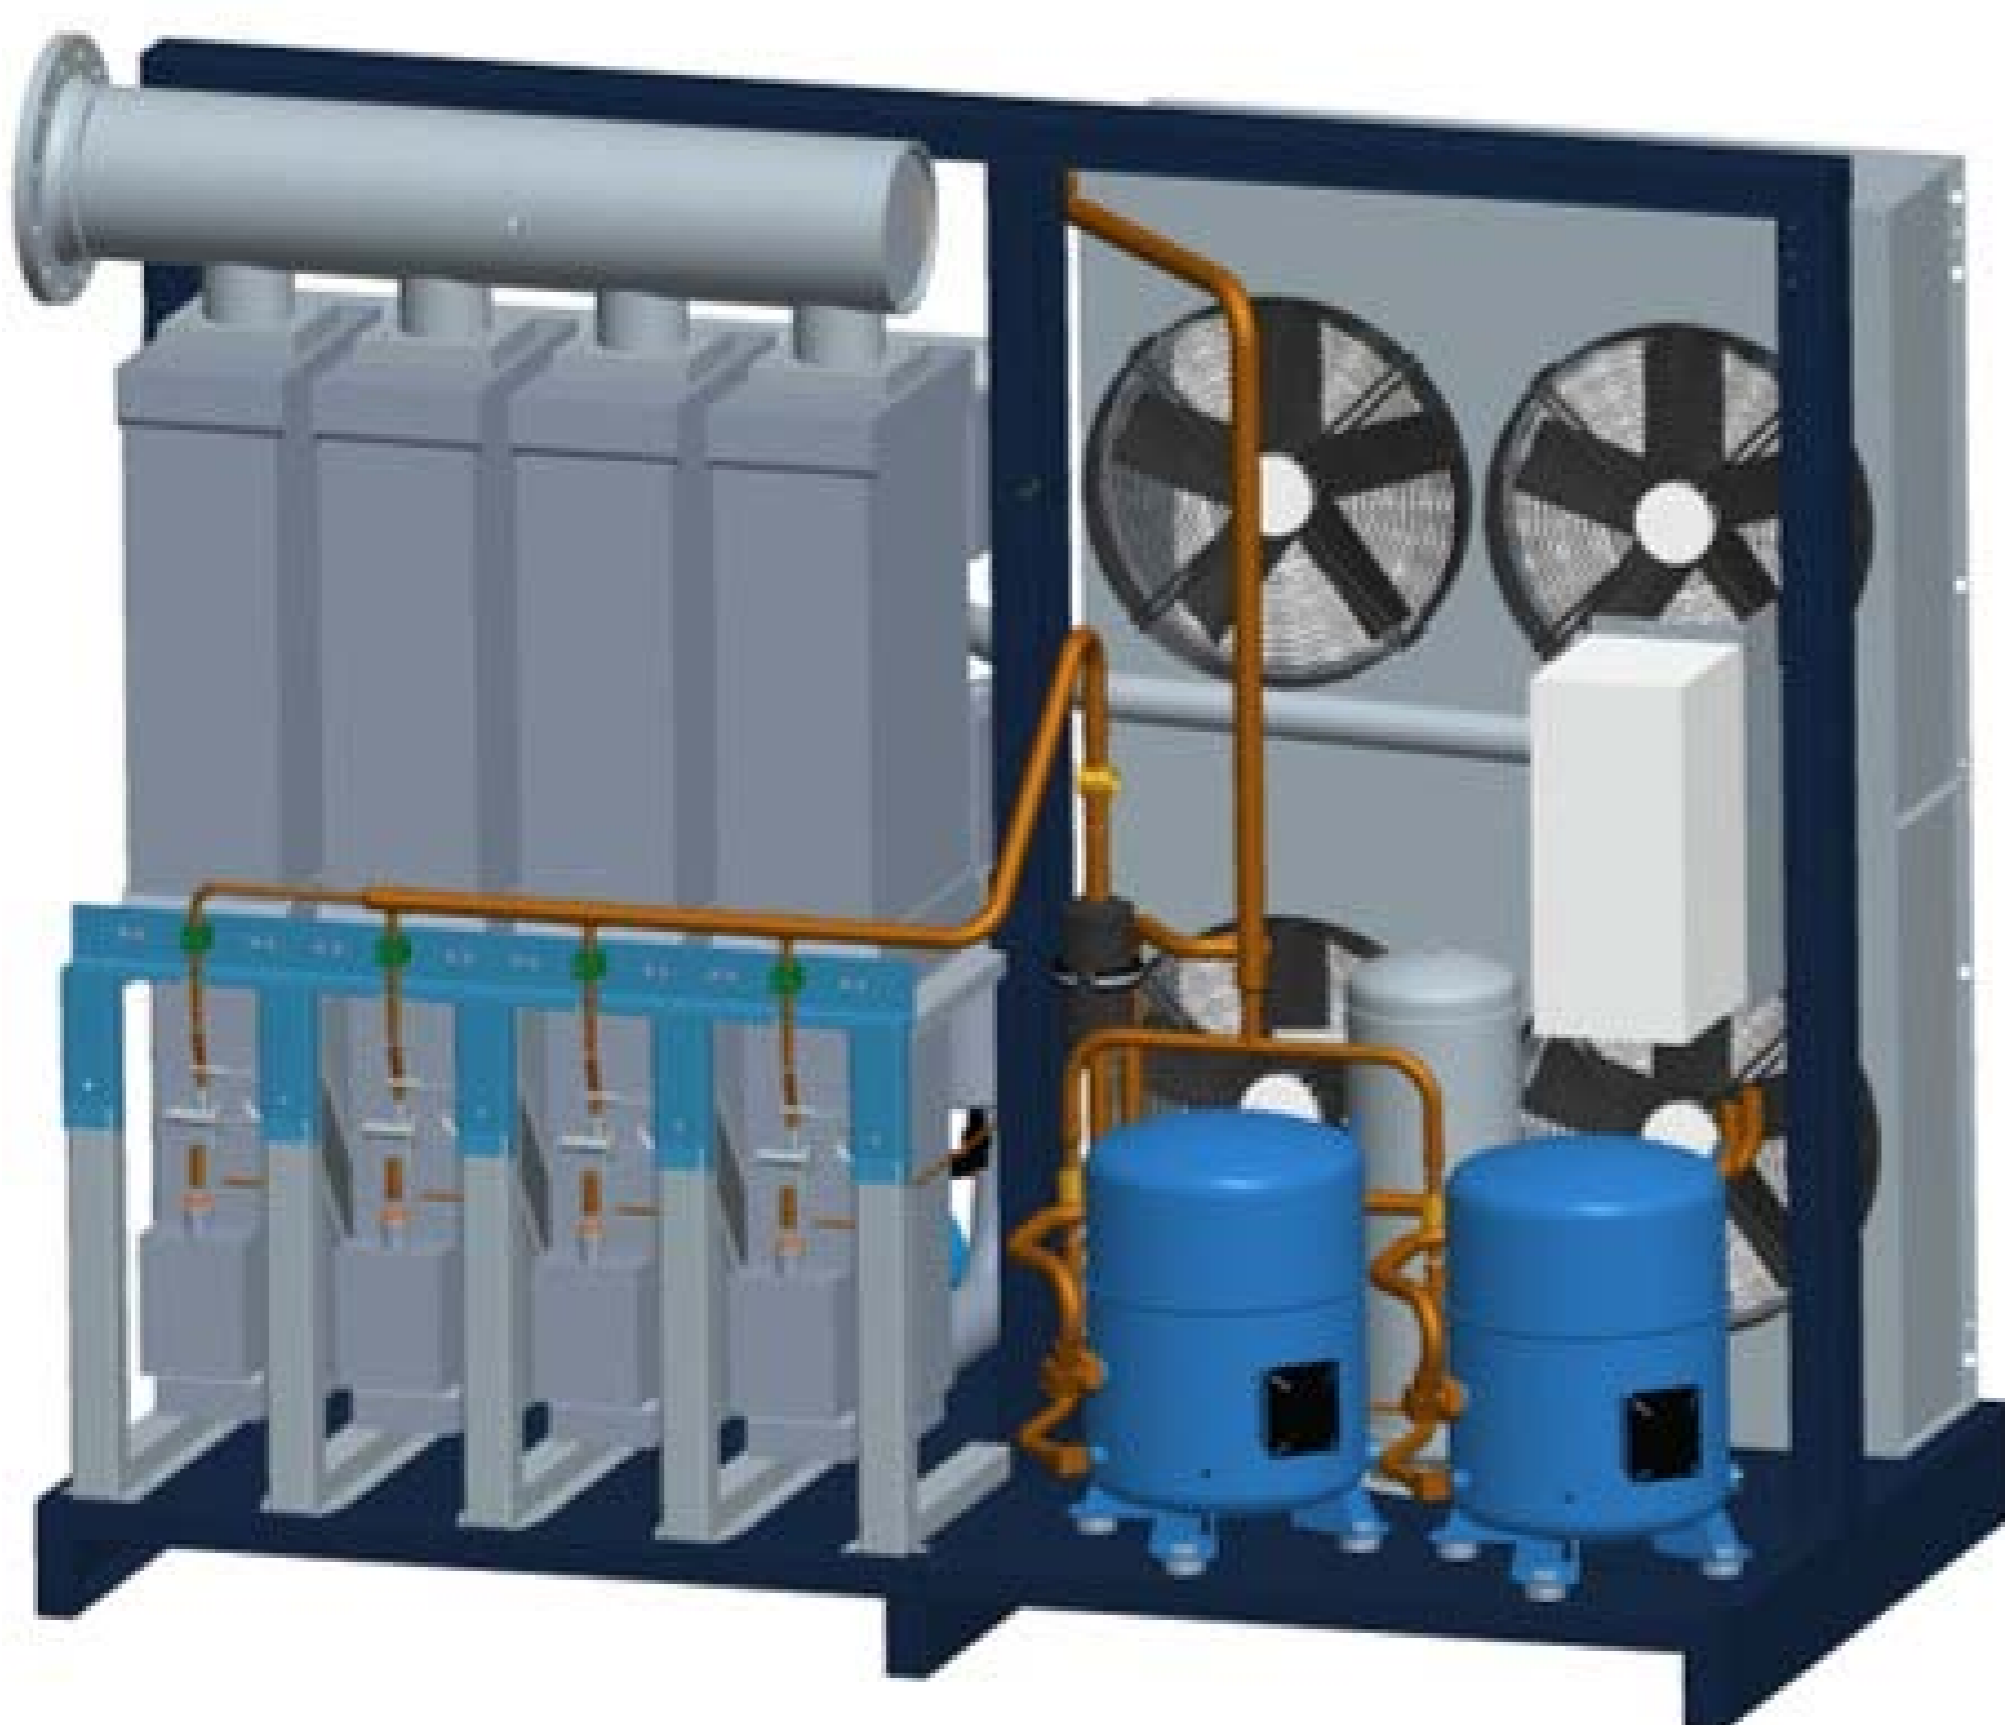

For over 46 years, PACE has been a trusted provider of high-quality and reliable compressed air solutions, from machinery to service and sourcing, for industry leaders in various sectors including automobiles, glass, textile, cement, packaging, chemicals, steel, metals, pharmaceuticals, and food & beverage.

Product Description

A Refrigerated Compressed Air Dryer is a highly efficient and reliable device that removes moisture from compressed air by cooling it to a point where water vapor condenses and is removed, resulting in dry, high-quality compressed air suitable for industrial applications.

Why is the product Required

A Refrigerated Compressed Air Dryer removes moisture from compressed air to prevent corrosion, improve efficiency and maintain product quality in industries such as steel, aluminum, glass, cement, pharmaceuticals, and semiconductors. The dryer cools the air to dew point temperature, causing moisture to condense and be removed, resulting in dry compressed air suitable for industrial use.

We'll help you find the right solutions for your business

Other dryers

In addition to our Refrigerated Compressed Air Dryers, we also offer a variety of other drying solutions, including **Desiccant Dryers, High Pressure Refrigerated Dryers, And Compressed Gas Dryers**, to meet the specific needs of your application.

Product Range

- The PACE Refrigerated Air Dryer is a top-of-the-line solution which is suitable for standard pressure levels up to 16 bar and air flow capacities of up to 17,000 CFM.
- It features a two-stage chilling process and high-quality aluminum heat exchanger for efficient and reliable performance. Our dryers are designed to withstand harsh conditions, equipped with low power consumption, constant dew point, easy installation and Eco-friendly refrigerant.

Desiccant Compressed Air Dryer

Benefits

Refrigerated Compressed Air Dryer removes moisture, preventing corrosion, improving efficiency, and ensuring clean, dry air for critical processes, reducing downtime and maintenance costs, improving product quality and meeting industry standards.

Other Solutions

Compressed Air Dryers | Filters | Drain Valves | Dehumidifiers | Crane Cabin A/C | Moisture Separators | Accessories & Spares | Sourcing | Testing & Certification | Servicing & Commissioning
