

Drain Valve

“Maximize system efficiency with our Drain Valves”

About Pace

For over 46 years, PACE has been a trusted provider of high-quality and reliable compressed air solutions, from machinery to service and sourcing, for industry leaders in various sectors including automobiles, glass, textile, cement, packaging, chemicals, steel, metals, pharmaceuticals, and food & beverage.

Product Description

Our Drain Valves are designed to effectively release condensed moisture from pressurized containers or pipelines for increased system efficiency.

The condensate drain valve automatically opens and closes to continuously remove condensate collected at the bottom of the system via a pipe or tubing, without loss of compressed air or gas.

Why is the product Required

- Proper management of condensate is crucial for efficient compressed air or gas systems. Without proper draining, even the best moisture removal equipment will be ineffective.
- Invest in a high-efficiency drain valve for all drain points to ensure your compressed air or gas system runs smoothly and avoid costly loss of compressed air or gas.

We'll help you find the right solutions for your business

Product Range

Our company specializes in providing innovative, efficient drain valves for compressed air systems, suitable for pressure ranges of 0.2 to 16 bar and temperatures from 1 to 60 degrees Celsius. Our zero air loss valves effectively remove condensate without loss of compressed air, ensuring optimal system performance.

Drain Valves

Benefits

The installation of PACE Drain Valves in compressed air or gas systems offers numerous benefits, including

- The **ability to effectively remove condensate without loss of compressed air**
- **Improved energy efficiency, and the added convenience of alarm contact features.**

Additionally, their ease of installation and maintenance make them a crucial component in maintaining the overall efficiency and effectiveness of a compressed air or gas system.

Other Solutions

Compressed Air Dryers | Filters | Drain Valves | Dehumidifiers | Crane Cabin A/C | Moisture Separators | Accessories & Spares | Sourcing | Testing & Certification | Servicing & Commissioning
